

Amrishkhan Sheik Abdullah

Technology Lead | Microservices & Backend Architect | Full-Stack Engineering

Dubai, UAE | +971 52 588 6136 | amrishkhan05@gmail.com
amrishkhan.dev | linkedin.com/in/amrishkhan | github.com/amrishkhan05

PROFESSIONAL PROFILE

Technology Lead with 10+ years of experience designing and delivering distributed backend systems, enterprise integrations, secure APIs, payment workflows, and full-stack products. Hands-on architect across Node.js, NestJS, TypeScript, React, and cloud-native services. Experienced in engineering leadership, production operations, and developer productivity tooling.

SELECTED IMPACT

- Delivered critical airline passenger journeys spanning check-in, seat selection, ancillaries, and boarding passes, with 95%+ automated test coverage on key modules.
- Designed BFF/microservice orchestration, standardized API error handling, and failure-aware integration patterns for enterprise systems.
- Integrated Magnati and Network International payments, including webhooks, transaction processing, and reconciliation workflows.

TECHNICAL EXPERTISE

Backend & architecture Node.js, NestJS, Express, TypeScript, Java / Spring Boot, REST, GraphQL, WebSockets, microservices, event-driven systems, API orchestration

Frontend React, Next.js, Angular, Vue, Vite, JavaScript, HTML/CSS, Material UI

Data & cloud PostgreSQL, MongoDB, MySQL, SQL Server, AWS (AppSync, Amplify, Lambda), Azure DevOps, Firebase, Linux, Nginx, CI/CD, GitHub Actions

Security & tooling RBAC, authentication, webhook integrations, Jest, Playwright, RAG, MCP, Tauri/Rust, developer tools

PROFESSIONAL EXPERIENCE

Technology Lead Analyst - Backend | techcarrot FZ LLC

Aug 2022 - Present • Dubai, UAE

- Architect and deliver scalable Node.js, NestJS, and TypeScript services supporting airline check-in, seat selection, ancillary services, boarding passes, and downstream enterprise APIs.
- Build secure BFF/orchestration layers with validation, API response standardization, retry strategies, fault handling, and asynchronous integration patterns.
- Lead payment integration work involving Magnati and Network International, webhook-driven status updates, and reconciliation flows.
- Own operational quality through Linux/Nginx administration, monitoring, debugging, release readiness, architecture reviews, code reviews, and mentoring.

Lead Engineer / Full-Stack Developer | MSYS Technologies

May 2021 - Aug 2022 • Bangalore, India

- Led full lifecycle technical delivery, from discovery and architecture through implementation, testing, deployment, and production handover.
- Built Node.js and TypeScript APIs, React/Next.js experiences, and integrations with Java-based enterprise services.
- Promoted reusable engineering patterns, performance improvements, technical reviews, QA collaboration, and delivery standards.

Senior Software Engineer | Full Potential Solutions

Jul 2019 - May 2021 • Chennai, India

- Developed GraphQL middleware and cloud-integrated services using AWS AppSync, Amplify, and Lambda to simplify application data access.
- Delivered multi-recording audio playlist features, reporting modules, and reusable frontend/application components.
- Supported concurrent release cycles, CI/CD delivery, production issue diagnosis, and performance improvements.

Programmer Analyst | Cognizant Technology Solutions

Aug 2016 - Jul 2019 • Chennai, India

- Developed enterprise MEAN-stack applications, reusable Angular components, and API-driven business functionality.
- Created reusable Angular directives, services, and shared application modules for consistent enterprise interfaces.
- Collaborated across requirements, testing, debugging, delivery support, and production maintenance.

PRODUCTS & OPEN SOURCE

Aruvix | aruvix.com Built a privacy-first, local-first developer workspace with React, TypeScript, Vite, and Node.js; browser-native JSON utilities, API workflows, format transformations, and developer experience features.

Published npm packages @amrishkhan05/frankly (focused code-change diffs); @amrishkhan05/hallpass (engineering rule enforcement); sql-select-query-generator (configuration-driven SQL SELECT generation).

EDUCATION & CERTIFICATIONS

B.E., Electrical & Electronics Engineering - St Joseph's College of Engineering, Chennai (2016)
