

Amrishkhan Sheik Abdullah

TECHNICAL LEAD | FULL STACK ENGINEER

Dubai, UAE.

+971 52 588 6136 | amrishkhan05@gmail.com | linkedin.com/in/amrishkhan | github.com/amrishkhan05

Profile

Full-stack developer with strong expertise in frontend and backend frameworks, focusing on API development and design. Proficient in database management, server management, and payment gateway integration. Recognized for problem-solving skills and effective team collaboration. Committed to continuous learning through active contributions to open-source projects, aiming to deliver impactful digital solutions.

Education

Bachelor's in Engineering: EEE | Apr 2016 | St Joseph's College Of Engineering - Chennai, India

Professional Experience

Techcarrot FZ LLC - Dubai, UAE | Technology Lead Analyst Backend | August 2022 - present

- **For a Leading Realty Company:** Engineered the complete backend from scratch and developed the entire admin portal using Next.js. The system handles user access on multiple levels (parking, community areas, amenities, family member management), amenity bookings, and service fee payments.
- Integrated payment gateways, including Magnati and Network International, designing backend systems for seamless update of records using webhooks..
- Handled the application's deployment on a Linux server.
- Divided APIs into microservices to enhance scalability and maintainability.
- Incorporated UAE Pass for streamlined user creation and login processes.
- **For a Major International Airline:** Served as a full-stack developer, building and managing the passenger check-in module using Angular and NestJS. The module handles key functions like food and beverage orders and seat mapping.
- Authored extensive test cases to achieve above 95% code coverage.
- **For a Manufacturing and Fabrication Company:** Developed a comprehensive timesheet module from scratch, including a dynamic calendar and varied working hours. Spearheaded full-stack application development for clients across multiple domains.
- Developed a dynamic query generator function for dynamic SQL queries based on JSON configuration and released it as a npm package.
- Designed and engineered comprehensive database structures and APIs, optimizing them for application requirements.
- Proactively monitored application logs to immediately address and fix any issues that arose.
- Wrote **cron jobs** to periodically maintain data consistency and uniformity between your system and third-party systems.

MSys Technologies - Bangalore, India | Lead Engineer, Full Stack Developer | May 2021 - August 2022

- Led the full lifecycle management of applications, ensuring complete project ownership from initiation through to delivery.
- Managed all client requirements, ensuring timely and effective delivery of solutions.
- Developed and maintained SQL stored procedures to handle all database operations for API requests.
- Established and documented coding best practices and standard workflows through in-depth research.
- Engaged directly with clients post-release to gather feedback and implement continuous improvements.
- Conducted in-depth research to establish, document, and maintain coding best practices and standard workflows.
- Established and documented coding best practices and standard workflows through in-depth research.
- Worked on both the Node.js backend and Next.js frontend of applications.

Full Potential Solutions - Chennai, India | Senior Software Engineer | July 2019 - May 2021

- Assumed responsibility for all Front-End requirements of the entire project.
- Constructed a GraphQL Middleware layer using Node.js, deployed via AWS services such as AppSync, Amplify, and Lambda, which reduced the load on the front-end application.
- Collaborated effectively with diverse teams while managing several projects, each with different deployment timelines.
- Introduced novel features, including a custom audio player with playlist capabilities for managing multiple call recordings.
- Authored SQL queries executed during API calls, seamlessly integrating them within the app's reporting modules.

Cognizant Technology Solutions - Chennai, India | Programmer Analyst | August 2016 - July 2019

- Operated as a MEAN stack developer, creating dynamic web pages and building REST APIs using Angular 6, Prime NG library, Node.js, and MongoDB.
- Constructed generic components, pipes, and directives, enhancing the application's functionality and flexibility.
- Introduced keyboard shortcuts within web pages, improving user experience and interface interaction.
- Developed **custom directives** for image uploading, ensuring seamless integration.
- Constructed **reusable modules** for applications across multiple software projects, promoting efficiency and uniformity.

Tools and Languages

Programming Languages: JavaScript, TypeScript, HTML5, CSS3.

Frontend Frameworks & Libraries: React, Angular, Vue.js, Next.js, jQuery, Bootstrap, Material UI, chart.js.

Backend Frameworks: Node.js, Express, NestJS, Sails.js.

Databases & ORMs: MongoDB, MySQL, MSSQL, PostgreSQL, Mongoose, TypeORM.

Cloud Platforms: Firebase, MongoDB Atlas, AWS (AppSync, Amplify, Lambda).

DevOps: Nginx, Git, GitHub, GitLab, Postman, Swagger, Jira, Azure DevOps.

Tools: VS Code, Codepen, Stackblitz, npm, yarn, MSMS, MySQL Workbench, DBeaver.

Specialized Skills: Full Stack Development, API Development (REST & GraphQL), Microservice architecture, Payment Gateway Integrations (Network International & Magnati), Databases and Server Management, Responsive Design, Testing and Debugging (Jest) , API Design & Documentation.

Languages

Tamil | English | Malayalam

Declaration

I affirm that the information provided above is accurate and true to the best of my knowledge. I take full responsibility for the details mentioned in this resume.
